CPE Developer Day
Winter 2010 Workshop

Brant A. Cheikes
bcheikes@mitre.org / 781-271-7505
22 February 2010
Logistics

- **Workshop Hours:** 9:00 – 5:00

- **Breaks:**
  - Morning  10:15-10:30
  - Lunch    12:30-1:15
  - Afternoon 2:15-2:30 & 4:15-4:30

- **Restrooms**

- **Cafeteria**
Schedule

- 0915-1015 1: Introduction & Overview
- 1030-1145 2: CPE Community Needs
- 1200-1415 3: CPE Target State
  - 1230-1315 Lunch
- 1430-1630 4: Proposing CPE Changes
- 1630-1700 5: Action Planning
Agenda for Segment 1

- Workshop Motivation and Objectives
- Target Milestones
- Process
- Survey Results
- Setting Expectations
Workshop Motivation

- CPE is not succeeding, where success is defined as:
  - Achieving significant and growing vendor support;
  - Stimulating increasing volumes of product data contributed by the community to the CPE Dictionary;
  - Acceptable to NIST for inclusion in a future release of SCAP;
  - Deployed in product offerings to foster inter-vendor tool interoperability;
  - Manageable across time and scale for large deployments.
Workshop Objectives

- Describe near- and longer term target capabilities that CPE spec and content management processes must support;
- Prioritize potential changes to the CPE specification and content maintenance process;
- Determine next steps that the CPE specification moderators and the user community need to take.
CPE V2.3: Fix as much as we can without breaking backward compatibility w/ 2.2
   – Backward compatibility means that CPE 2.2 content is still acceptable under 2.3 specification
   – For entry into next release of SCAP, a stable draft needs to be completed by ~July 2010

CPE V3.0: Get it right
   – Likely to break backward compatibility
   – Stable draft by ~July 2011 for SCAP FY12
Overall Process Vision

CPE Workshop
- Refine, Analyze, Prioritize
- Propose Changes

Core Team
- Draft Changes
- Release CPE 2.3 Spec and Implementation Plan
- Implement Community Services
  - e.g. reference apps, examples, documentation, tools.

Positive Feedback Loop
- Stakeholder Survey
- Compile/Summarize
- Critical Needs
Today’s Process: Overview

- Structured, facilitated process
- **Elicitation** of specific and actionable recommendations from the community

**Work sessions:**
- Community needs (2 hr)
- Capabilities required to address needs (2 hr)
- Changes required to provide capabilities (2 hr)
- Action planning (30 min)

**Work sessions seeded with, but not limited to, survey response data**
Summary:
- 17 responses received: 13 commercial, 4 US Govt
- 40 “top 3 challenges”, 36 “critical issues”, 15 “additional issues”

Analysis:
- Grouped inputs into 10 categories of concern
- Rank ordered categories of concern
- Further consolidated items within each category
- Results used to seed discussions during workshop segments 2 and 3
Q1: What is your Role?

- User of security automation tools (e.g. Network Security Engineers, Security Information Managers)
- IT security automation tool vendor, independent tester, consultant
- Moderator of related initiative (e.g. OVAL, XCCDF, SCAP)
- IT vendors whose software and hardware products will be described in the CPE dictionary
- Other

Other Specified:
- NIST NSRL
- Belongs to the developer community of an open-source tool for vulnerability management (sigvi)
- CPE Dictionary Moderator, CPE-related Service Provider
- Internal use in research related databases
- Vulnerability database service provider in Japan
Q2: Status of Organization’s Use of CPE?

- Currently using CPE
- Planning to use CPE (specify when)
- Considering the use of CPE
- Using another standard that includes CPE
- Not using CPE, but would if the standard were different (specify deficiencies that would have to be addressed)
- Other
Q3: Other SA Standards Being Used?

- Common Configuration Enumeration (CCE)
- Common Vulnerabilities and Exposures (CVE)
- Common Vulnerability Scoring System (CVSS)
- Extensible Configuration Checklist Description Format (XCCDF)
- Open Vulnerability and Assessment Language (OVAL)
- Other

Other Specified:
- NVD CVE XML feeds
- OCIL, SCAP, Developing data standards, web services, etc., using CPE
- ARF/ASRF
- CWE
- ARF/ASR
Q4: Planned Automation Areas (Next 2 yr)?

- Software Inventory (authenticated scanning)
- Network-Based Device and Software Discovery (unauthenticated scanning and event management)
- Forensic Analysis/System Architecture (identify the footprint of a piece of software)
- IT Management (e.g. configuration management, patch management, remediation, license management)
- Security Compliance Management (FDCC or other checklist compliance)
- Network Knowledge Management
- Incident or Event assessment and management
- Software Build/Release Management

Other

Other Specified:
- Lots of research based areas under investigation
- Confidential
CPE Survey Questions 5-7

Q5: Describe your organization’s top three security automation-related technical challenges that are related to CPE.

Q6: Describe the issues that you feel are critical to improving CPE’s ability to support your organization’s automation-related challenges in the future.

Q7: Describe any additional issues (technical or other) that you think are important to address at the upcoming CPE workshop.
## 10 Response Categories

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dictionary Content</td>
<td>The elements, attributes, and instances that comprise CPE Dictionary content</td>
</tr>
<tr>
<td>Best Practices</td>
<td>Best practices in the development, maintenance and implementation of CPE</td>
</tr>
<tr>
<td>Governance</td>
<td>Policy oversight of CPE Specification development, change management, interoperability, and stakeholder interests</td>
</tr>
<tr>
<td>Specification Changes</td>
<td>Changes to version 2.2 of the official CPE Specification</td>
</tr>
<tr>
<td>Quality Assurance</td>
<td>CPE Quality Assurance practices and measures</td>
</tr>
<tr>
<td>CPE Language</td>
<td>The CPE Language (contained in version 2.2 of the CPE Specification)</td>
</tr>
<tr>
<td>Outreach</td>
<td>Activities that raise awareness of CPE, solicit participation in the CPE community, and make a business case for CPE adoption</td>
</tr>
<tr>
<td>Usability</td>
<td>The ease of use of CPE and CPE-related artifacts (e.g. specification and documentation)</td>
</tr>
<tr>
<td>Implementation Support</td>
<td>Shared methods, tools, and documentation that facilitate the implementation of CPE in Security Automation tools and systems</td>
</tr>
<tr>
<td>Adoption</td>
<td>Community acceptance of CPE as evidenced by the deployment of CPE-compliant product offerings</td>
</tr>
</tbody>
</table>
### Top 6 response Categories in Rank Order

<table>
<thead>

</table>
Top 6 Categories Per Question

Challenges and Issues by Percent Category

- Best Practices
- Spec. Changes
- Dict. Content
- Qual. Assurance
- Implem. Support
- Governance

- Challenges
- Critical Issues
- Additional Issues
- Average
Setting Expectations

- Need active participation from all attendees
  - Especially the vendors
- Goal is **consensus**, not necessarily agreement
  - Consensus guidance to the Core Team on what we need to do to make CPE successful
- Emphasis on specific, feasible recommendations
“As with CVE, a smaller focus is better and easier to use and then other things can be built on those initial building blocks. Currently we are overdoing it.”

“Change the mentality from an academic endeavor to a production mentality. It is currently being used and cannot be radically changed.”

“Put a stake in the ground and quit trying to constantly change it.”
Ockham's Razor

YOU’RE DOING IT WRONG.
Ground Rules

- This meeting is at the UNCLASSIFIED level
- Please sign in:
  - Initial next to or add your name
  - Verify and correct/add contact information
- One conversation at a time
- Must display visitor badge at all times
- Please return from breaks on time
- Workshop roles
  - Facilitators: foster polite on-topic discussion
  - Moderators: keep us on track
  - Scribe: records workshop
CPE WORKSHOP SEGMENT 2: COMMUNITY NEEDS
CPE 2.x CONOP: Overview

```
 CVE-2009-2817
```

```
“cpe:/a:vend:prod:8.0:-:win”
```

```
“cpe:/a:vend:prod:8.0”
```

```
unique identifier
```

```
-applicability statement
```

```
“signature mapping”
```

```

Segment 4: Thematic Question

What specific changes (additions, deletions, documented implementation guidance) do we need to make to the CPE specification in order to achieve the target state?
Approach

 Iterative elicitation:
  – Propose a specific change (ideally, with champion)
  – Tie it back to a target capability
  – Triage it: would it break backward compatibility?
  – Straw poll: does the proposal have support?
  – Rinse and repeat

 Prioritize:
  – Group into “for 2.3” and “for 3.0” bins
  – Consensus rank if possible (H/M/L)
Some Candidates

1. Limit scope of Dictionary to only those products with reported vulnerabilities
2. Limit dictionary scope to “concrete” products
3. Drop the “prefix property” requirement
4. Unpack “edition” component
5. Break CPE up into a set of controlled vocabularies, a naming format, and a Dictionary standard
6. Define an alternative (non-URI) transport format
7. Drop the CPE Language from the spec
8. Make CPE names “searchable”
9. Exclude “hardware” from CPE
More Candidates

- Assign GUIDs to CPEs
- Reserve tentative vendor names
- Define translation algorithm from complex version to standard CPE version
CPE WORKSHOP SEGMENT 5: ACTION PLANNING
Wrap-up

- Action items and responsible parties?
- Monthly Core Team web conferences?
- When next DevDay workshop?

Actions for all:
- Send feedback on today’s workshop to cpe-list or bcheikes@mitre.org
- Please continue today’s work on the discussion list, e.g., continue to post proposed changes
- Stay engaged!
